1. Introduction

What is ClearMem?

ClearMem is a cutting-edge application that does 1 thing: Clears your RAM. You simply run the application and watch your RAM consumption drop considerably! ClearMem fully integrates with all Steam games as well as non-Steam games and applications!

How does it work?

ClearMem examines your operating system and builds two internal lists:

- (a) What is non-critical to your OS?
- (b) What is critical to your OS?

ClearMem then sends specialized commands to your non-critical processes (list a) that effectively tells the processes to "Release your physical memory used NOW". This causes these processes to release their physical working-set memory used, commit certain amounts of data to your page-file, and considerably frees up your available RAM.

In addition, ClearMem understands what processes are critical to your Windows OS remaining stable (list b). ClearMem will bypass those processes, enabling them to continue to operate normally. This is critical to enabling your OS to continue to run smoothly without any OS slowdowns.

Minimum system requirements

- **OS:** Windows 7 64-bit, Windows 8 64-bit, Windows 10 64-bit
- **Processor:** Any CPU
- **Memory:** 2 GB RAM

2. Interface

1. **Engage Memory Clearing** – Clicking this button will engage the Memory Clearing and the overlay showing the progress will show up.
2. **Log file** – Open the logfile.txt to see the latest file generated after Memory clearing was engaged, seeing the processes affected and the RAM cleared.
3. **Run game with higher priority** – This area is made specially for you to drop any shortcut you want. It will first engage memory clearing followed by the launching of the game/app you have dropped
4. **History** – Easily free RAM + Launch any game or app using history shortcuts.

3. Features

STEAM INTEGRATION

The screenshot shows the CLEARMEM application window. On the left, it displays memory usage: "3,102 MB CURRENT" and "6,753 MB 5 MIN AVG". To the right of this is a green and yellow chip icon with a hand cursor pointing to it. Below the memory stats is a large dashed-line box containing the text "Drag Steam Shortcut/App Here".

PRESS TO ENGAGE CLEARMEM

OR DRAG/DROP ANY STEAM SHORTCUT DIRECTLY INTO THE APPLICATION TO RUN CLEARMEM AND IMMEDIATELY START YOUR STEAM GAME
